We can source any type of flooring to order including exotic timbers and different hand finishes

Fitting Services for our Floors

We have negotiated preferential rates for the fitting of all our floors. The costs below are for our London and Home Counties services. Our costs across the rest of the country will depend on where you are but they will generally be between £18/m² to £22/m². You will always get a better price for large quantities.

We now have our own subsidiary company which is ***The Solid Wood Flooring Fitting Company Limited*** and if this company is used we guarantee both the flooring and installation. We have several experienced teams that are monitored by the Managing Director of the fitting company. The prices for fitting will depend on the board, the state of the subfloor and working environment. For example if it is an empty room or house we can generally fit 100m² to 200m² in a day and costs will be between £18/m² to £25/m². Our fitting prices include trimming of all doors, architraves and cutting the skirting board so that the floor can go underneath.

If you do not use our fitting service you must read all the terms and conditions on the web site and make sure that the person fitting your floors knows what he is doing. You should follow the fitting guidelines and always check the humidity and moisture content of your subfloor.

We can supply and fit or supply only. Should you wish to use our fitting service only then there is a premium of 40% on our price should you buy someone else's floor, as on numerous occasions we get quality problems and it takes us longer to fit.

Solid Wood Floors

You must always acclimatise a solid wood floor in the rooms where it will be laid for at least 10 days. Remember Solid Wood Floors will expand and contract during the seasons and the extent of this will depend on your heating and personal requirements.

Engineered Wood Floors

Generally the cost of fitting engineered boards is less due to the fact that they can do not expand and contract as much as solid boards, do not need to be acclimatised and due to our quality. Our Engineered Parquet panels are also very easy to fit and can be used with underfloor heating. Parquet panels will cost less than a quarter of the price of individual blocks.
