

Random Length Specification for all our RL Wooden Flooring

The normal random lengths in the industry tend to have a lot of short boards with an average length of 720mm or less we understand the importance of quality products and have therefore come up with what we think is the answer. The chart below shows what will be in each layer in each carton with all the possible variations? On the odd occasion this may vary a little but in general terms the sizes below are what you will get in each carton. Normally with random lengths from other manufacturers you will get only one long board every three or four cartons, with our boards you know what you are getting. Engineered wooden flooring random lengths for all our widths. The percentage of every layer is 20%. the layer of 1100+1100 is 10%(there is one layer in two cartons)

Average length of our bards will be about 900mm to 1000mm

Engineered Wooden Flooring 20*150/189*2200RL(400-1800MM) Lengths per Carton		
Carton	Length of Board / Carton	Remark
Layer 5	400 + 400 + 600 + 800	Only layer 5 will have 3 or 4 nested pieces and they will be any one of the following combination of sizes 400 + 500 + 500 + 800 400 + 500 + 600 + 700 700 + 700 + 800 600 + 600 + 1000 600 + 700 + 900
Layer 4	900 + 1300	Could be replaced with 800 + 1400 or 600+1600 or 700+1500
Layer 3	1000 + 1200	Fixed length
Layer 2	1800 + 400	Could be replaced with 500+1700
Layer 1	1100 + 1100	Fixed length
Carton 2		
Carton	Length of Board /Carton	Remark
Layer 5	400 + 400 + 600 + 800	Only layer 5 will have 3 or 4 nested pieces and they will be any one of the following combination of sizes 400 + 500 + 500 + 800 400 + 500 + 600 + 700 700 + 700 + 800 600 + 600 + 1000 600 + 700 + 900
Layer 4	900 + 1300	Could be replaced with 800 + 1400 or 600+1600 or 700+1500
Layer 3	1000 + 1200	Fixed length
Layer 2	1800 + 400	Could be replaced with 500+1700
Layer 1	900+1300	Could be replaced with 500 + 1700 1000+1200 400+1800 700+1500 600+1600 800+1400
