Thank you for your enquiry. The Green Guide to Specification which is used by architects and specifiers within the UK and Europe to source environmentally sustainable construction products. Green Guide ratings have been compiled for generic building elements which include floor coverings on an as installed basis. Engineered oak floors have been assessed and the ratings are in the screenshot below from our website <http://www.thegreenguide.org.uk>.

Green Guide 2008 ratings

Building type > **Domestic**

Category > **Floor Finishes**

Element type > **Hard Floor Finishes**

	Element number	Summary rating

As you can see the ratings for engineered oak flooring on a scale of A+ to E are at the top end of the scale. You would be able to state in publicity that your products correspond to the rating for the relevant element number but not that the ratings specifically apply to your products. This can only be done with a certified environmental profile which will generate bespoke ratings for your products. Please let me know if you would like more information on this.

Kind Regards

Andrew Dutfield
